4 Jurisdictions Flow Matrix

Notes about this flow matrix.

The process of civilizational growth is based on merit. It is designed to follow a cumulative step-by-step progression through the planetary jurisdictions. It begins by first earning sovereignty over the Soil jurisdiction, second the Land, third the Sea, and fourth the Air jurisdiction in that specific order. Delays in this progress are permissible as long as the flow remains in the correct order. But if all, or even part of this flow is altered (through reversal or inversion or both) then serious problems will result. At the time of this writing we are living through the end results of both a reversal and inversion of this growth process.

A normal and healthy planetary growth process proceeds from the ground up, but we have been subjected to a top down reversal, and that is in contravention of universe rule. To further complicate matters, in recent generations an inversion of two of these jurisdictions has also occurred. Starting approximately 100 years ago (early part of the twentieth century), the Air jurisdiction inverted its functional position with the Sea jurisdiction. Refer to this [chart](#) for more details.

How has this inversion manifested itself in real life? To be quite frank we have all been witnessing it and living through it our entire lives, but few of us have really grasped the true significance of this colossal occurrence. The manifestation of this Air <> Sea inversion is realised through the unlawful MUNICIPALIZATION of vast numbers of nations, states, provinces, territories, cities, towns, villages and communities.

The MUNICIPAL system is of the Air jurisdiction, and as such the Air jurisdiction has power over nothing. Refer to the chart in the [Planetary Jurisdictions Curriculum LESSON 2](#) for more details. MUNICIPALIZATION is nothing more than an incorporation scheme for creating profit driven business franchise entities under a parent franchise, this parent being the VATICAN INC. Yet, through this functional inversion, the Air jurisdiction has utterly and unlawfully overstepped its bounds and encroached massively on all the other jurisdictions.

Light and Life categories by planetary jurisdictions

Notes about this entity diagram.

As this diagram illustrates, the major 10 categories of Light and Life development are also intrinsically linked to the planetary jurisdictions. The personal Soil jurisdiction is where all these categories are grounded except for Governance which is purely an impersonal group related function. The further away we get from the Soil and Land the less jurisdictional control is exerted over the Light and Life categories, with the Air jurisdiction having the least control.

The four Planetary Jurisdictions exist in two functional frameworks: The **natural** and the **artificial**.
The artificial framework is sub-divided into two functional spaces: the *physical* and the *conceptual*.

Jurisdictional Progress of Civilization

Notes about this flowchart.

This simple flowchart gives a bird's eye view of the problem of jurisdictional encroachment. This is a critical subject which is covered in greater detail in the [Planetary Jurisdictions Curriculum LESSON 6](#).

Jurisdictional Progress of Civilization

The growth of civilisation, according to universe law patterned on jurisdictions, demands that mankind earns its sovereignty over each jurisdiction, one at a time, and in accordance with the universal law of merit. This requires adherence to the proper flow of evolutionary progress as depicted in the chart below. The next jurisdiction cannot be earned until the current one has been successfully mastered.

The correct plan

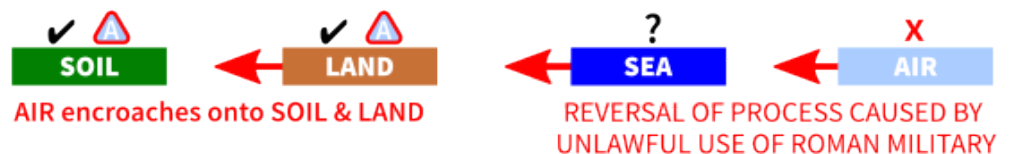

The plan calls for evolutionary growth uplifted by lawfully revealed guidance. History clearly shows that this peaceful plan was long ago superseded by unlawful Roman and British invasionary tactics that are still ongoing today.

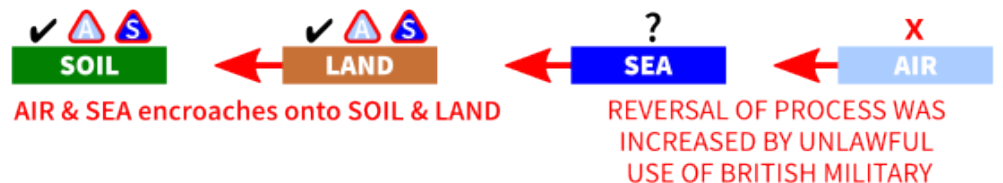

The incorrect reality

Pre 16th century
Under the Roman
Empire

Post 16th century

Jurisdictional inversion

Notes about this flowchart.

This chart illustrates the inversion that has occurred with the Air and Sea jurisdictions.
